

EndNote 21

文献管理软件

(Windows版)

主要内容

- 1 文献管理软件简介
- 2 下载安装
- 3 新建数据库
- 4 收集题录
- 5 管理全文
- 6 分析管理题录
- 7 写作助手

研究者迫切需要：个性化知识库

1. 建立集快速收集、有序存储、可检索的个人文献库。
2. 题录关联全文，随读随记。
3. 多角度归类、分析、筛选文献。
4. 随写随引，自动调整参考文献格式顺序。

1. 文献管理软件简介

- **EndNote** 我校订购了单机版
- **NoteExpress** 我校订购了单机版
- RefWorks
- Reference Manager
- Mendeley 免费使用, 只有网络版
- Zotero (免费), LaTeX (数学)

2. 下载与安装

复旦大學圖書館 FUDAN UNIVERSITY LIBRARY

开放时间 续借/预约 培训讲座

个人文献管理工具

NoteExpress文献管理软件 [? Help](#)

EndNote Web

EndNote (客户端版)

2. 下载与安装

通过复旦大学[网上办事服务大厅](http://ehall.fudan.edu.cn)下载

<http://ehall.fudan.edu.cn>

个人通过校园认证登录后，进入服务中心---IT服务---EndNote 文献管理工具进行下载；或直接搜索“EndNote文献管理工具”进行下载。

2. 下载与安装

■ **注意：安装前必须关闭Word。**

■ Windows系统

① 解压下载的安装包

务必将EN21Inst.msi以及License.dat两个文件放到同一文件夹内，不可直接放在桌面上

① 双击EN21Inst.msi文件进行安装，不需要输入序列号。

■ Mac系统

直接运行dmg文件即可安装。

2. 下载与安装（版本号21.2）

■ 软件升级

- ① 安装完毕，首次运行时，系统会检测最新版本，提示用户升级。
- ② 可按系统提示，点击“Download and Install”，完成版本升级，更新至最新版。
- ③ 如不想更新，可点击“Ignore This”，跳过版本更新。

■ 特别提示

软件仅供本校师生使用，请勿向校外任何个人和组织转发软件副本或授权码。因违规行为造成经济损失或法律纠纷，由违规者承担。

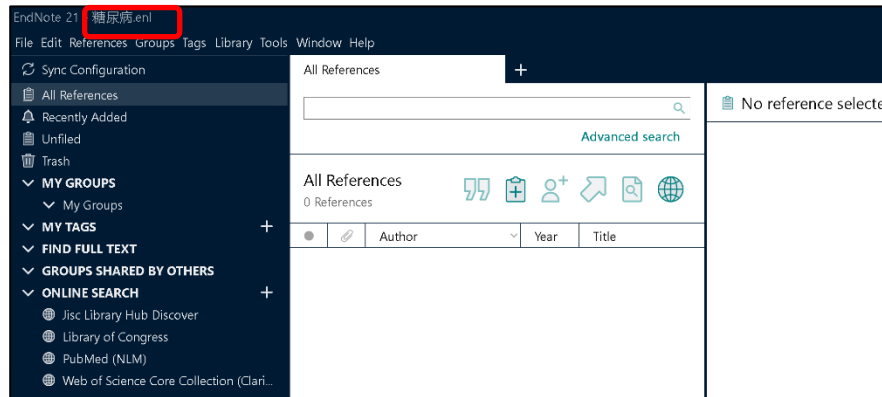

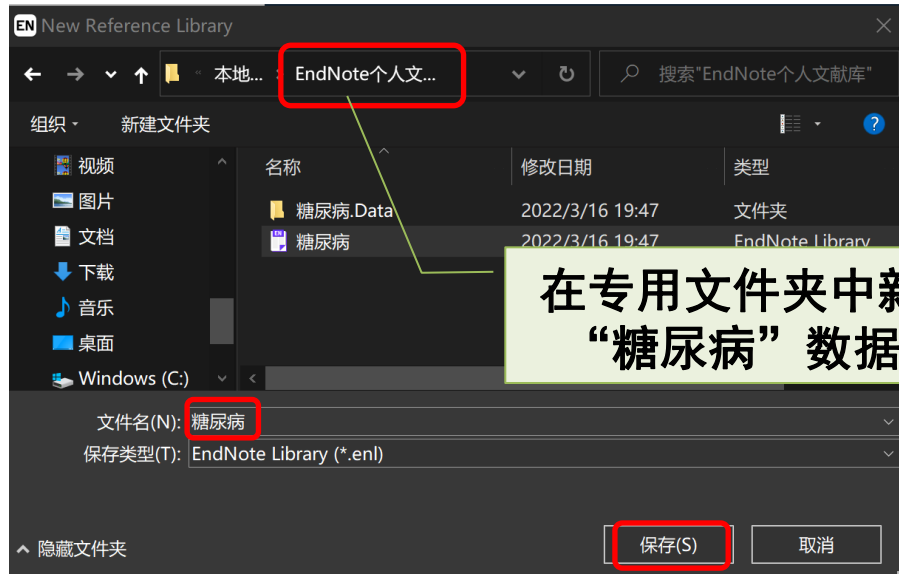

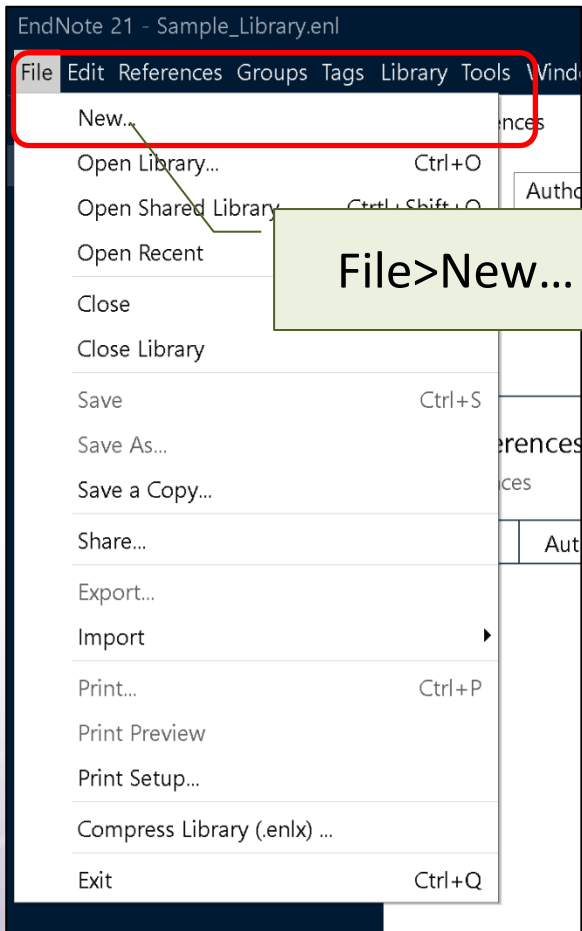

3. 新建数据库

先建立保存EndNote资料的文件夹，再建立数据库

- 例：新建 “D:\EndNote个人文献库” 文件夹
- 集中保存个人数据库文件，便于拷贝备份。

建议在非系统盘建立专用文件夹

数据库界面

EndNote 21 - 糖尿病.en

4. 收集题录

4.1 批量导入题录

- ◆ 将数据库中多条题录一次性导入至EndNote中
- ◆ 数据库检出文献导出：
优先选择EndNote格式，没有该选项时，可选择其他合适的格式导出
- ◆ 导入EndNote：
在Import Option中选择合适过滤器 (Import Filter)

4.1.1 批量导入题录-CNKI

The screenshot shows the CNKI search results page for the topic '高血压' (Hypertension). The search results are sorted by '相关性' (Relevance). Four articles are selected, indicated by checkmarks in a red box. A dropdown menu is open, showing various export formats, with 'EndNote' selected in a red box. Two callout boxes provide instructions: '1. 勾选所需论文' (Select required papers) and '2. 点击导出文献, 选EndNote' (Click export literature, select EndNote).

1. 勾选所需论文

2. 点击导出文献, 选EndNote

4.1.1 批量导入题录-CNKI

The screenshot shows the CNKI website interface. On the left, the '文献导出格式' (Literature Export Format) menu is open, with 'EndNote' selected and highlighted in blue. The main content area displays the 'EndNote' export options, including '预览' (Preview), '批量下载' (Batch Download), '导出' (Export), '复制到剪贴板' (Copy to Clipboard), and '打印' (Print). The '导出' button is highlighted with a red box. A callout box with a green border and black text points to the '导出' button, containing the text '3. 点击导出, 保存文件' (3. Click Export, Save File). Below the buttons, the export format is set to '%0 Journal Article'. The list of selected records includes authors like 熊兴江, 王朋倩, 姚魁武, and 侯敬乐, and titles such as '中国中医科学院广安门医院, 中国中医科学院中药研究所, 中国中医药治疗高血压病研究进展' and '高血压病; 中医药治疗, 研究进展'. A preview of the first record is shown at the bottom, starting with '%X 高血压病是心脑血管事件的重要诱因, 已成为全球重大公共卫生问题...'.

4.1.1 批量导入题录-CNKI I

4.1.3 批量导入题录-PubMed-Send to

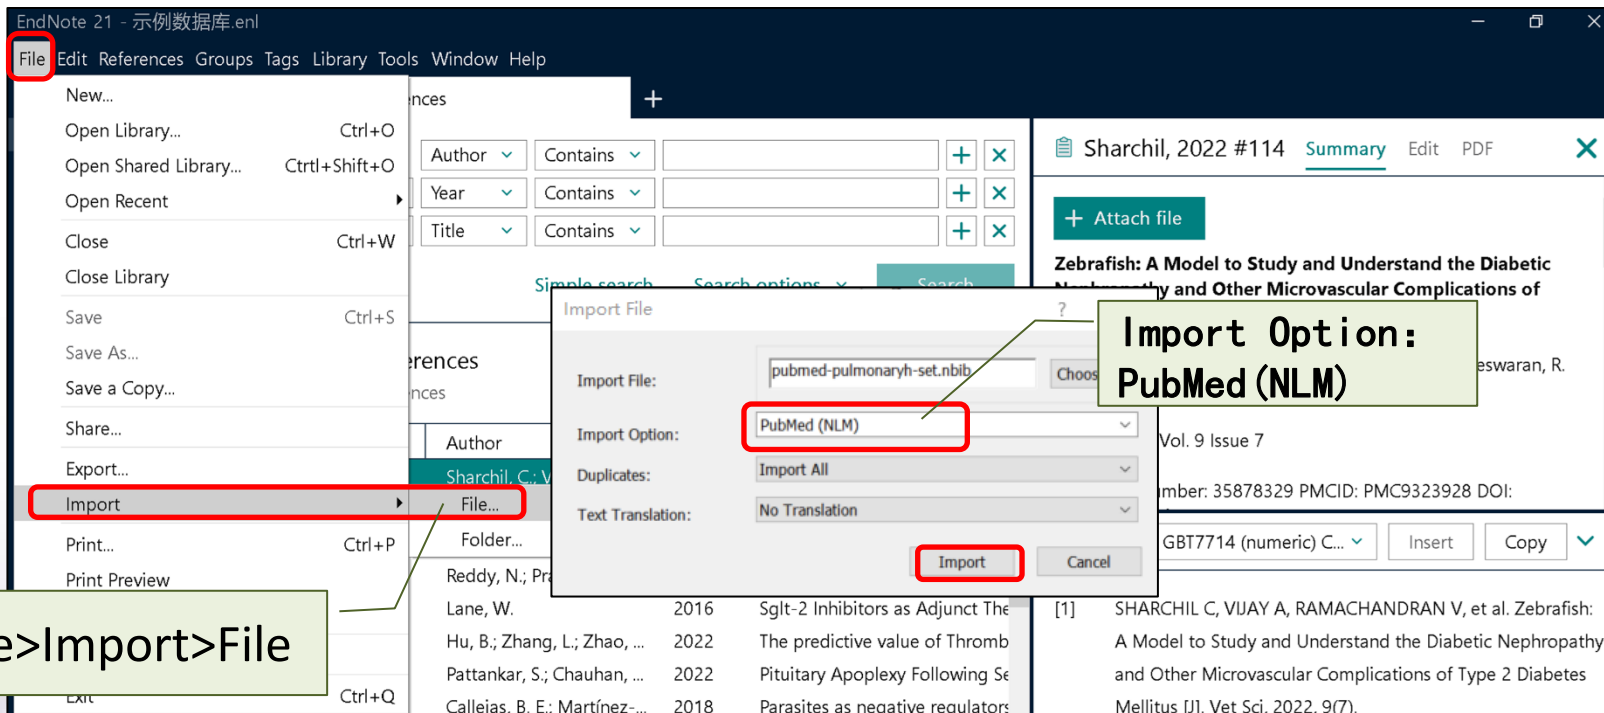

方法一

The screenshot shows the PubMed search results page for 'diabetes mellitus'. The search bar at the top contains 'diabetes mellitus' and a 'Search' button. Below the search bar are links for 'Advanced', 'Create alert', and 'Create RSS'. A 'Send to' button is highlighted with a red box and a circled '2'. A dropdown menu is open, showing options: 'Clipboard', 'My Bibliography', 'Collections', and 'Citation manager', with 'Citation manager' highlighted by a red box and a callout box pointing to it that says '选择Citation manager'. Below the dropdown is a 'Selection (3)' dropdown and a 'Create file' button highlighted with a red box and a circled '3'. At the bottom, a list of search results is shown, with the first result 'Oxidative Stress: Pathogenetic Role in Diabetes Mellitus and Its Complications and Therapeutic Approaches to Correction.' highlighted by a red box and a circled '1'. The second result is 'Diagnosis and classification of diabetes mellitus.'.

4.1.3 批量导入题录-PubMed (Save)

方法二

The screenshot shows the PubMed search results page for 'diabetes mellitus'. The search bar at the top contains 'diabetes mellitus' and a 'Search' button. Below the search bar, there are options for 'Advanced', 'Create alert', and 'Create RSS', along with a 'User Guide' link. The results are sorted by 'Best match' and display options are visible. A red box labeled '2' highlights the 'Save' button. Below this, the 'Save citations to file' section is shown. A green box labeled '选择PubMed格式' points to the 'PubMed' option in the 'Format' dropdown menu, which is also highlighted with a red box labeled '3'. A red box labeled '4' highlights the 'Create file' button. At the bottom, the search results are displayed, with a red box labeled '1' highlighting the 'Cite here' button for the first result: 'Oxidative Stress: Pathogenetic Role in Diabetes Mellitus and Its Complications and Therapeutic Approaches to Correction.' The second result is 'Diagnosis and classification of diabetes mellitus.'

4. 1. 3 批量导入题录-PubMed (Save)

The screenshot shows the EndNote 21 interface. The 'File' menu is open, with 'Import' selected and 'File...' highlighted. The 'Import File' dialog box is open, showing the file 'pubmed-pulmonaryh-set.txt' selected, 'PubMed (NLM)' as the import option, and 'Import All' for duplicates. A list of references is visible in the background.

EDITORIAL

Type 1 diabetes is increasing in very young children, but is the real reason referable only to environmental factors?

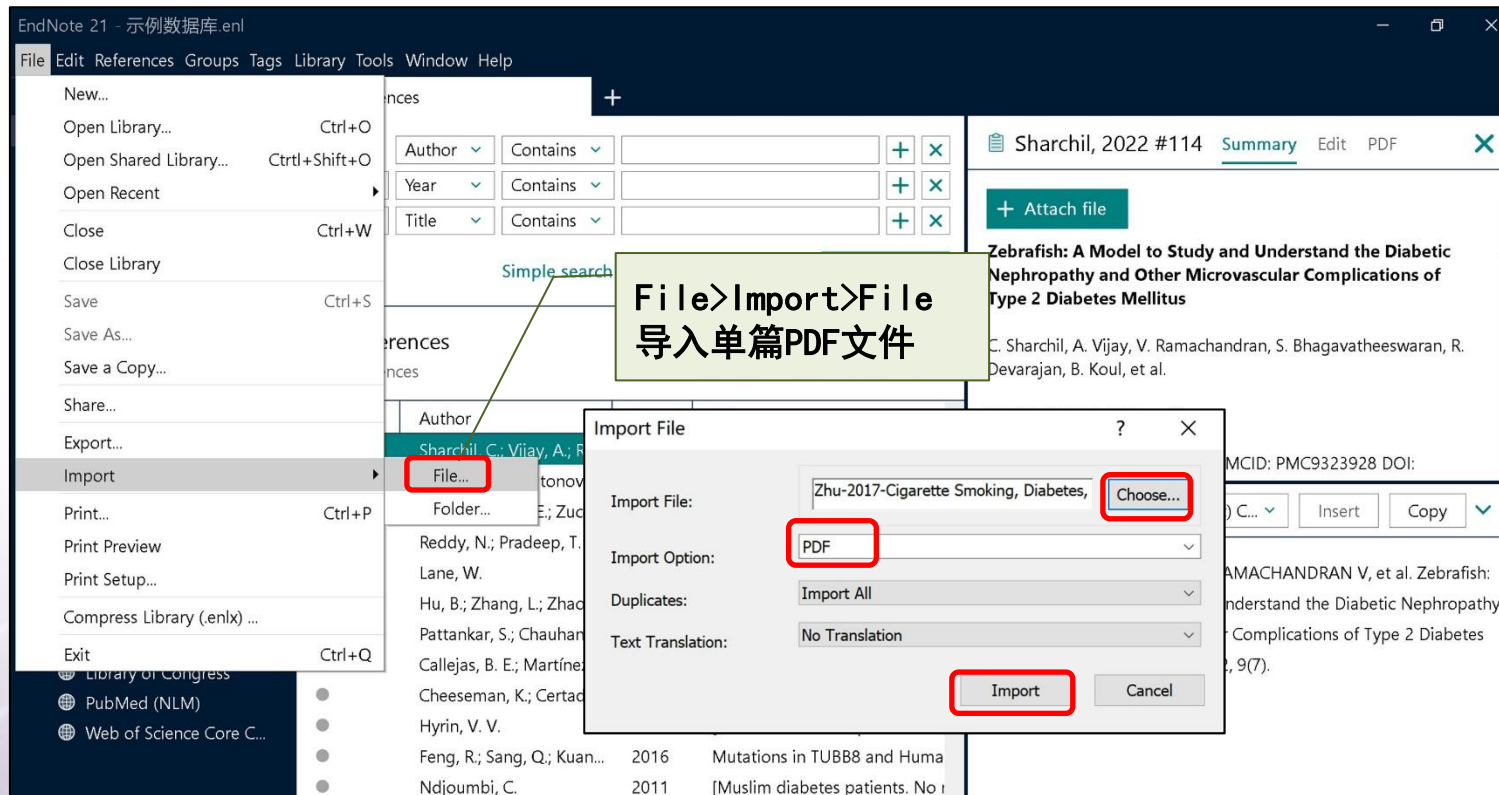

Andrea E. Scaramuzza · Gian Vincenzo Zuccotti

Received: 24 November 2011 / Accepted: 15 December 2011 / Published online: 30 December 2011
© Springer-Verlag 2011

In spite of intensive research in recent decades, the causative factors of type 1 diabetes remain unknown. To some extent the disease is genetically influenced, and mostly by explanation is that blood group incompatibility may be the most important factor, together with the practice of phototherapy, used to treat the more severe cases of jaundice,

量子点同时标记细胞内的血清素，并用多色成像系统对其进行成像，成功避免了成像中假阳性物质的干扰，使标记的结果更可靠。该法还可用于快速、有效标记细胞蛋白、辅酶及微量营养物质等。

2.1.2 体内成像

近红外荧光活体成像 (700 ~ 900 nm) 近年来引起人们较多的关注，因为生物分子在这个区域内的光吸收值最低，对体内光学成像的干扰小，而近红外量子点对深层组织和器官的检测具有较高的灵敏度和对比度，促进了活体动物实时荧光成像技术的发展。Cai 等^[9]将发射波长为 705 nm 的量子点 (QD₇₀₅) 与精氨酸-甘氨酸-门冬氨酸 (RGD) 肽共价连接制成了靶向荧光探针，并向小鼠体内植入人胶质瘤细胞 (U87MG)。在尾静脉注射荧光探针 6 h 后，荧光信号聚集在小鼠的肿瘤部位，而 RGD 阴性细胞 MCF-7 中则未检出荧光信号。Cai 等还采用 RGD-QD₇₀₅ 与 RGD-Cy5.5 (Cy5.5 为一种有机荧光染料) 分别对小鼠胶质瘤进行成像。与 RGD-Cy5.5 相比，RGD-QD₇₀₅ 因其荧光强度高、光漂白性小及可连接多个 RGD 分子等性质，能更好地显示出肿瘤部位的位置和形状。

很少。Lim 等^[11]将 CD-56 抗体与 QD₇₀₅ 相连制成近红外探针用于追踪 NK 细胞在体内的分布情况。试验表明，量子点标记到 NK 细胞上后并不影响其活性，与未标记 NK 细胞的疗效相近，且量子点对 NK 细胞有较好的成像效果，可用于对细胞进行体内、体外成像。

2.2 量子点生物分析

2.2.1 量子点用于活性生物分子检测

量子点的荧光强度可在较长时间内保持稳定，光漂白性小。多种物质可引起量子点荧光强度的增强或降低，经过修饰后的量子点还可特异地检测某些生物活性分子。因此，量子点在生物分析方面也有广泛应用。

Chen 等^[12]以量子点免疫荧光法 (quantum dots-based immunofluorescence) 分析了大量乳腺癌临床样本，定量检测 HER2 受体的表达情况，并与传统的免疫荧光法 (immunofluorescence) 作对比。荧光原位杂交法 (fluorescence *in situ* hybridization, FISH) 验证表明，量子点免疫荧光法具有较好的特异性和灵敏度 (分别为 75.0% 和 79.6%)，且对免疫组织化学 (IHC) 2+ 样本有较高的检出率

Coated Glass and Vicryl Microfibers as Artificial Axons

Charles L. Howe
Departments of Neuroscience and Neurobiology

Key Words
Myelination · Neural repair · Central nervous system · Axons

Abstract
The complex interactions that regulate myelination of central nervous system (CNS) axons during the development of myelin sheaths and during the process of remyelination remain unclear. Elucidation of the cell-biological and -biochemical mechanisms supporting myelin production and elaboration requires a robust in vitro system that recapitulates the relationship between axons and oligodendrocytes in a manner that is open to molecular dissection. We provide evidence for an artificial axon culture system in which we observed oligodendrocytes extending large plasma membrane projections that frequently completely ensheathed fibers coated with a variety of extracellular matrix molecules. These membrane projections varied in extent and thickness depending upon the

Introduction
Central nervous system (CNS) myelination is a complex and highly regulated process that involves reciprocal communication between oligodendrocytes and axons. Both membrane-bound and diffusible factors participate in the generation and transduction of myelination signals, though most of these factors have yet to be identified [Raval-Fernandes and Rome, 1998]. The identification of

Acknowledgments

This work was supported by Donald and Frances Herdrich and by grants PP0893 and RG3636 from the National Multiple Sclerosis Society. The author acknowledges the excellent and ex-

tensive technical support provided by Jon Charlesworth and Scott Gamb in the Mayo Clinic EM Core Facility. Dr. Jeffrey Salisbury, Scientific Director of the Mayo EM Core Facility, most graciously provided free acquisition time and technical support during the pilot phase of this project.

7.2 插入引文

The image shows a workflow for inserting citations. On the left, the EndNote 21 interface displays a search for '哮喘' (Asthma) with 4 references. The reference by Jiang Bao'an (2015) is highlighted. A callout box points to this reference with the text: '在EndNote中选中要插入的引文' (Select the citation to be inserted in EndNote). On the right, a Microsoft Word document is open, showing a text block about asthma. A callout box points to a citation mark in the text with the text: 'Insert selected Citations'. The Word ribbon shows the 'References' tab with the 'Insert Citation' dropdown menu open, where 'Insert Selected Citation(s)' is highlighted.

在EndNote中选中要插入的引文

Insert selected Citations

哮喘和慢性阻塞性肺疾病（慢阻肺）是以气流受限为特征的常见性呼吸系统疾病，两者的发病机制有所不同^[1]。哮喘的发病机制目前尚未完全阐明^[2]。研究发现茶碱在哮喘和慢性阻塞性肺疾病治疗中具有免疫调节和抗炎的作用^[3, 4]。

7.7 自定义样式模板

(2) 选中一个style, 点击右键, 选Edit Style

The screenshot shows the EndNote 21 interface. On the left is a sidebar with navigation options like 'All References', 'Recently Added', and 'MY GROUPS'. The main window displays a list of references. A context menu is open over the 'Chinese Std GB/T7714 (numeric) Copy' style, with 'Edit Style...' highlighted in red. The 'Edit Style' dialog box is also visible, showing details for the selected style, including its name, category, and a comment: 'This style is for the Peoples Republic of China Standard GB/T 7714-2015. 顺序编码制'.

7.7 自定义样式模板

(3) 根据期刊要求，修改样式

The screenshot shows the EndNote software interface for editing a citation style. The window title is "Chinese Std GB/T7714 (numeric) Copy". The menu bar includes "File", "Edit", "Tools", "Window", and "Help". The toolbar shows "Plain Font", "Plain Size", and various formatting icons (B, I, U, P, A¹, A₁, Σ, A_{Bc}, and list icons).

The left sidebar shows a tree view of style sections. The "Citations" section is highlighted with a red box, and its sub-items are: "Templates", "Ambiguous Citations", "Author Lists", "Author Name", "Numbering", and "Sort Order". A green box highlights the "Citations: 正文中的标注方式" style name in the main area.

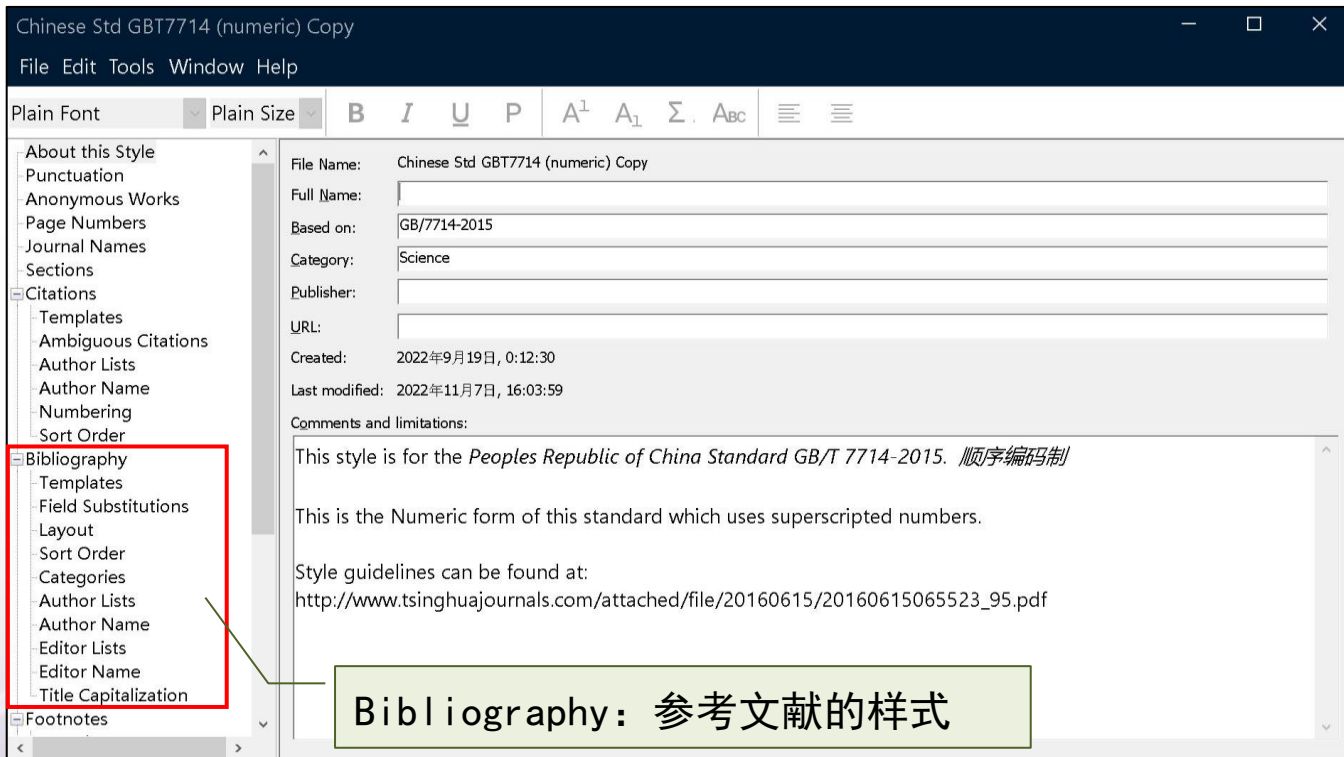

The main area displays the following information:

- File Name: Chinese Std GB/T7714 (numeric) Copy
- Full Name: [Empty field]
- Based on: GB/T7714-2015
- Category: Science
- Publisher: [Empty field]
- URL: [Empty field]
- Created: 2022年9月19日, 0:12:30
- Last modified: 2022年11月7日, 16:03:59
- Comments and limitations: This style is for the Peoples Republic of China Standard GB/T 7714-2015. 顺序编码制 numbers.

Style guidelines can be found at:
